

Template migration | Developer Documentation

Template migration

Updated: Nov 14, 2025

This document describes how to migrate templates from one WhatsApp Business Account (WABA) to another. Note that migration doesn't move templates, it recreates them in the destination WABA.

Limitations

Templates can only be migrated between WABAs owned by the same Meta business. Only templates with a status of `APPROVED` and a `quality_score` of either `GREEN` or `UNKNOWN` are eligible for migration.

Revision #3
